CATALOG No. 8 - Copyright 1929

P & C TOOLS are recognized by automobile, airplane, and other mechanics, as the best tools on the market today. The successful mechanic realizes that he must have good tools if he is to turn out good work.

P & C

"THE MASTER MECHANICS CHOICE"

In making P & C TOOLS, we use the best ALLOY STEEL it is possible to obtain, and every tool receives the strictest care as to workmanship. In the forging process used, the molecules of the steel are condensed and the steel is refined and toughened. Each tool is carefully heat treated and tempered by electric process and expert heat treaters.

P & C TOOLS are designed so as to take away that "clumsiness" found in ordinary tools. They "HANG" right. This feature enables the mechanic to make "SPEED" in his work, which is an important item in the present day highly-specialized servicing of all kinds of machines.

You will find in this catalogue practically every kind of wrench or tool you need for your work. Due to the ever changing models in automobiles, it is necessary for the tool-maker to be constantly designing new tools. Whenever a demand is created for a new tool, P & C will make it. P & C has always lead the way—others follow.

P & C TOOLS are guaranteed to be free from defects in material or workmanship. They are built to withstand the hardest service to which they should be put, but they are not guaranteed against wear. Any P & C TOOL that proves defective will be replaced or repaired free of charge.

"WE STRIVE TO PLEASE"

Every tool in this catalogue is made in the P & C Factory. PRICES ARE NET TO THE TRADE. (Subject to change without notice.)

DISTRIBUTED BY

Whenever you need any tools between calls of P & C Salesmen, mail your order to the distributor whose name is shown on this catalogue, and your order will receive prompt attention. In case you do not know the name of the distributor in your territory, send your order to the factory and it will receive the proper attention.

In the catalogue numbers, in practically all cases, the last two figures of the number indicate the size of the opening in thirty-seconds of an inch.

Example

6016—is a 6000 Series Socket having 16/32 or 1/2 inch opening.

Socket Size Table

Socket Opening Inches	Fits		U. S. S.

STEEL BOX for above as pictured		2.50

Set No. 6119-12—Twelve-Point opening sockets—same pieces as above, except with 12-point Opening Sockets instead of Hexagon opening.

6119-12 SET	\$20.00
6109-12 SET—Without Ratchet and Adaptor	16.00
STEEL BOX for above, as pictured	2.50

P & C Flex Handles

With 1/2" Square Service End
And 9/16" Hexagon Service End

On the P & C FLEX HANDLES ILLUSTRATED ABOVE, the service end is flexible. A ball snap in the hinged joint holds it in any position, and the handle can be used at any angle. The FLEX HANDLE can be used as an "L" or offset handle to loosen the nut, and without removing the wrench, the handle can be tipped up to use as a "T" wrench to speed nuts off. The FLEX HANDLES are great time savers, very strong and will stand hard usage.

No.	Price
A401 Small Handle, 9/16 Hex. Service end....	\$2.50
A402 Large Handle, 1/2 Sq. Service end.....	3.50
A403 Small Handle, 1/2 Sq. service end.....	2.50
A404 Large Handle, 9/16 Hex. service end....	3.50

P & C Small Flex Sets

The above illustration shows the popular P & C Flex Set which is made up of the Small Flex Handle with cross bar, and six sockets. This Set is furnished either with the 1/2" Square or 9/16" Hexagon service end, and with Hexagon or Twelve Point opening sockets. The sockets with this set have openings as follows: 7/16, 1/2, 9/16, 5/8, 11/16, 3/4.

No.	Price
A400 Hexagon Service Connection, 6 Hexagon opening sockets	\$5.75
A405 Hexagon Service Connection, 6 Twelve Point opening sockets.....	5.75
A410 Square Service Connection, 6 Hexagon opening sockets	5.75
A415 Square Service Connection, 6 Twelve-point opening sockets	5.75
STEEL BOX for any of the above sets, as illustrated	1.00

P & C Large Flex Sets

The Large FLEX SETS are made up of the Large Flex Handle, 8" Extension and 8 Sockets. The Large Handle, with wider range of sockets and the extension makes a very complete set for the mechanic. The sockets are furnished in either Hexagon or 12-point openings as follows: 9/16, 5/8, 11/16, 3/4, 25/32, 13/16, 7/8, 15/16.

No.	Price
A460 9/16 Hexagon Service Connections, 8 Hexagon opening sockets and A463 Extension	\$9.00
A465 9/16 Hexagon Service Connections, 8 Twelve point opening sockets and No. A463 Extension	9.00
A470 1/2" Square Service Connections, 8 Hexagon Opening Sockets, and No. A473 Extension	9.00
A475 1/2" Square Service Connections, 8 Twelve Point sockets and A473 Extension	9.00

The above sets are also furnished without the Extension the numbers being the same as above with (-X) added, which indicates without extension.

A460-X Without Extension	\$7.75
A465-X Without Extension	7.75
A470-X Without Extension	7.75
A475-X Without Extension	7.75

Steel Box for any of the above sets as
illustrated

P & C Major Flex Sets

The Set illustrated above contains both the Small and Large Flex Handles, the 8" Extension, and 13 sockets having openings: 7/16, 1/2, 9/16, 19/32, 5/8, 11/16, 3/4, 25/32, 13/16, 7/8, 15/16, 1", 1 1/16. Either Hexagon or 12-point opening sockets.

No.	Description	Price
A480	Large Flex Handle, Small Flex Handle 8" Extension having 1/2" Square Service connections, and 13 sockets having Hexagon openings	\$14.00
A485	Large Flex Handle, Small Flex Handle, 8" Extension, with 1/2" Sq. Service connections, and 13 sockets with 12-point openings	14.00
A490	Large Flex Handle, Small Flex Handle, 8" Extension, with 9/16" Hexagon Service connections, and 13 sockets with Hexagon openings.	14.00
A495	Large Flex Handle, Small Flex Handle, 8" Extension, with 9/16 Hexagon Service Connections, and 13 sockets with 12-point openings	14.00
STEEL BOX for any of the above sets.....		2.50

P & C Flex Speeder Handle and Sets

The FLEX SPEEDER illustrated combines the features of the SPEEDER and the FLEX service end. An excellent handle for all kinds of work. Makes a very efficient and speedy rim lug tool, as the nuts can be broken loose with a great force and then speeded off, without removing the wrench from the nut. Reverse action for replacing.

No.	Description	Price
5401	FLEX SPEED HANDLE—1/2" Square SERVICE CONNECTION	\$2.50
5402	FLEX SPEED HANDLE—9/16" Hexagon SERVICE CONNECTION	2.50
THE FOLLOWING SETS CONSIST OF THE FLEX SPEED HANDLE AND 6 SOCKETS HAVING OPENINGS AS FOLLOWS: 7/16, 1/2, 9/16, 5/8, 11/16, 3/4. Either Hexagon or 12-point openings.		
5400	9/16 Hexagon Service Connection, 6—Hexagon opening sockets	\$5.75
5405	9/16 Hexagon Service Connection, 6—12-point sockets	5.75
5410	1/2" Square Service Connection, 6—Hexagon opening sockets	5.75
5415	1/2" Square Service Connection, 6—12-point opening sockets	5.75
Steel Box for any of above		2.20

Hex-On Socket Sets and Pieces

We also make practically all pieces shown in the illustration on page 4, with a 9/16 Hexagon Service Connection, instead of the square. These pieces and sets are exactly the same as the ones shown on former pages, with the exception of having the Hexagon Connection instead of the Square.

No.	Description	Price

7109-12 SET—Same as 7109, except has 12-point opening sockets	16.00
STEEL BOX FOR ANY OF THE ABOVE....	2.50

P & C Sockets

Every P & C SOCKET is an individually made tool. They are made from a special analysis Alloy Steel, which is treated by an electric heat treating and tempering process, insuring uniformity. P & C Sockets are noted for their toughness and durability, and are designed right. The sizes are accurate and the walls are as thin as it is possible to make them insuring strength. The handle openings are accurate to size, making it possible to slide the socket on and off the handle easily, yet a tight fit is insured.

The last two figures of the number indicate the size of the opening in thirty-seconds of an inch, and the first two figures indicate the Series. 12 Point Opening Sockets are indicated by -12 following the series number and size number. Example: 6014-12, is a Socket of the 6000 Series, which means 1/2" Square Hole for Handle, having 14/32 or 7/16 opening, and is of the 12 point type.

(DESCRIBED AND PRICED ON FOLLOWING PAGES.)

Sockets For Speed Wrench Shanks

5000 SERIES

These sockets can be attached to any speed wrench shank, by squaring the shank and driving the socket on. PRICES APPEAR IN TABLE FOLLOWING.

Sockets with 1/2" Handle Openings

NO. 6000 SERIES

The No. 6000 Series Sockets have 1/2" Square hole for handles. They fit our regular P & C Handles, as well as any other makes of handles having the 1/2" square service connection. The 6000 Series Sockets are made with either Hexagon or Twelve Point Openings. PRICES APPEAR IN TABLE FOLLOWING.

Sockets with 9/16" Hexagon Handle Openings

NO. 7000 SERIES

The No. 7000 Series Sockets have 9/16" Hexagon hole for handles. They fit our regular handles having 9/16" service connection, as well as any handles using this type of connection. PRICES APPEAR IN TABLES FOLLOWING.

P & C Heavy Duty Socket Sets For Truck, Tractor and Other Heavy Duty Work

NO. 9108-12 SET

The HEAVY DUTY SET ILLUSTRATED ABOVE is far superior to anything of this type on the market. The best of material is used in the handles and the sockets. It is impossible to tell how good this set is—you must see it to appreciate it. The Twelve Point Sockets give a big advantage, as they will handle either hexagon or square nuts. All service connections are 5/8" Square.

No. 9108-12—HEAVY DUTY SET.....\$39.70

The HEAVY DUTY SET SHOWN ON PRECEDING PAGE consists of the following units, 8 Handles

No.	Price
9001 15" Extension	\$2.70
9002 8" Extension	2.30
9003 15" L Handle	2.30

Heavy Duty Universal Joint

No. 9007—HEAVY DUTY UNIVERSAL JOINT. \$4.50
Short Bend Offset Socket Wrenches

HAND FORGED FROM ONE PIECE OF CHROME VANADIUM STEEL

The walls of the sockets are made thin, which makes it possible to use this wrench on nuts that cannot be reached with other wrenches. The above wrenches have 12-point sockets, and require only half the room for the swing of the wrench. They will also fit square nuts. Every wrench is treated by a special electric heat treating and tempering process. Where a one piece wrench is desired, these cannot be beaten.

Heavy Duty Offset Wrenches

The Heavy Duty Offset Wrenches, covering sizes from 1 1/8" up, are very useful for all types of heavy work, such as rear axle nuts on Trucks, Tractors, and other heavy machines. Each wrench is made with handle in proportion to the size of the socket, and the sockets are made as thin as practical to insure strength in this size of wrench. Either with hexagon or 12-point opening.

Hexagon		12-point	
No.	Opening	No.	Opening

1552	1 5/8	1552-12	1 5/8

Long Bend Offset Socket Wrenches

The Long Bend Offset Socket Wrenches are the same as the Short Bend Series, but heavier. The bend in the handle is longer, giving them greater clearance above the nut, or face of the part where the nut is located. They are especially good for main bearing, connecting rod, and cylinder head work. Long Bend Offset Wrenches are furnished in Twelve Point, Hexagon and Square Openings. The Twelve Point and Hexagon Opening Wrenches are offset 3 inches, and the Square Opening Wrenches are offset 2 inches.

P & C Twelve Point Box Socket Wrenches

Hand forged from one piece of Chrome Vanadium Steel. The twelve-point box socket wrenches are designed for use in very close places, where there is not room for the full swing of the hexagon wrench. They fit the hexagon nuts of their various sizes, but require but half the room for the swing of the wrench. They also fit square nuts.

Double End 12-Point Box Socket Wrenches

The wrenches as illustrated above have twelve point box socket on both ends, one end being straight and the other offset. Where you need a straight wrench, you have it—and if there is an obstruction the offset will clear it. The openings are the same on both ends.

P & C Stud Bolt Wrenches

The P & C Stud Bolt Wrench illustrated above is adapted for use with the various style handles having 1/2" Square or 9/16" Hexagon service connections. The knurled roller works on eccentric, insuring positive grip on the stud. These Stud Bolt Wrenches work with "L", "T" or Speed Handles. Will take studs on all cars and trucks. There are three sizes—small for studs 5/16 to 7/16—medium for studs 1/2 to 5/8—large for studs 5/8 to 3/4. The Body has heavy knurling, which makes it easy to pull off handles. Rollers are made with greatest care from the best of steel, specially heat treated and tempered, but on account of the fact that they are bound to wear in time, the rollers are not guaranteed. Rollers may be replaced by driving out the pin which holds them. A very handy tool for all classes of Stud Bolt work.

Screw Driver Set

The famous P & C Sole Leather Screw Driver Handle, with 1/2" Square connection, which has double ball snap. The blades are hand forged from Chrome Vanadium Steel, and are furnished in both the Heavy Duty and General Purpose types, with a wide range of sizes. All standard 1/2" Square handles also work with the blades. The heavy duty blades have 1/2" Square Shoulder as illustrated, on which our regular ratchet works, making a ratchet screw driver—or any open end or crescent wrench may be used.

Wheel Starters

These Wheel Starters are hand-forged from Chrome Vanadium Steel, and are re-tempered. If the threads of the axle are damaged, this tool acts as a die in straightening the threads.

Screw the Starter on tight, so that the end of the axle is against the bottom of the socket, and then a stroke or two with a hammer will loosen the wheel so that it can be easily removed. Better than any wheel puller or other device for removing the wheel from the rear axle.

All Tappet Wrenches shown in the catalog are hand-forged from Chrome-Vanadium Steel and the last two figures of catalogue number indicate the size of the opening in thirty-seconds of an inch.

Double End Tappet Wrenches

Hand Forged from one piece of Chrome Vanadium Steel

The P & C Double End tappet wrenches are thinner than any tappet wrenches on the market. They are made of Chrome Vanadium Steel, the openings are exact and the entire wrench is carefully heat treated to give long service. These wrenches have the same size openings on both ends, one end being straight with the handle and the other at an angle which will be found to be perfect for tappet work.

UNIVERSAL SOCKETS

Universal Sockets are very handy and save a lot of time and trouble in getting at those nuts that are in bad places. They are made with the short shank as illustrated, and fit the various types of handles and attachments, making it possible to form many distinct Universal Socket Wrenches. Made with the 1/2" Sq. and 9/16 Hexagon Service Connection.

Special Attachments And Sockets CARBURETOR DRAIN PLUG DRIVER

No. 6017\$1.00

The Carburetor Drain Plug Driver illustrated has 1/2" Square Service connection, and the bit is designed for use on the drain plug on the Marvel Carburetor. An exceptionally handy tool wherever this Carburetor is used.

DRAG LINK SOCKET

For use on slotted nuts of any kind, but especially on automobile and truck steering assembly. Have 1" Blade.

6076

6076 1/2" Square Service Connection\$1.00
7076 9/16" Hexagon Service Connection 1.00

WING NUT SOCKETS

For adjusting brakes where the Wing Nut is used. Has slot which fits over the wings, making adjustment easy and fast.

6075

6075 1/2" Square Service Connection.....\$1.00
7075 9/16" Hexagon Service Connection 1.00

EXTRA DEEP SOCKETS

The extra Deep sockets are 2 1/2 inches overall and are very handy for work where the nuts are deep. Good on body work, spring U bolts, spark plug work, and main bearing work on some motors.

Tools For New Model "A" Ford

Rear Main Bearing Wrench

Hand Forged from Chrome Vanadium Steel
12-Point Socket

The New Model "A" Ford requires this wrench for work on the rear main bearing. This wrench was worked out in conjunction with an expert Ford mechanic, on his first main bearing job on the New Car, and pronounced by him as a perfect wrench for the job.

No. NF 24—Rear Main Bearing Wrench—3/4"
12-point Socket\$2.25

Front & Center Main Bearing Wrench

Hand Forged From Chrome Vanadium Steel
9/16 Square Socket

This wrench is a necessity on the Front and Center Main Bearings on the Model "A" Ford.

No. NF 18 S—Front & Center Main Bearing
Wrench, 9/16" Square Socket\$2.25

Ford and Chrysler Pump Nut Spanner

Also for Adjusting Chevrolet Steering Gears—Hand
Forged from Chrome Vanadium Steel

No. 1201—Spanner Wrench\$.60

New Ford Tools Ford Valve Lifter

The Valve Lifter illustrated above is necessary on the Model A Ford and works equally well on the Model T Ford, also on many other cars. The "tong" part takes firm hold on the spring, and the "foot" is on a double swivel which fits on the edge where the plate has been removed. On the Model T Ford and on some other cars there is a hole in the "foot" in which a hook is used, hooking it up over the manifold bolts or anything overhead. This is a very effective Lifter and works equally well for removing and replacing the spring. A REAL VALVE LIFTER. No. 0001 Price \$2.50

Flex Handle with Individual Socket

The Flex Handle illustrated with individual double hexagon or 12-point socket, is preferred by many mechanics to the loose socket type, for the reason that it is possible to get in closer places with it. This wrench is very handy in close places and is speedy. Prices following.

Speeder Flex Handle With Individual Socket

The Speeder Flex Handle with individual socket is similar to the above except that the handle is of the speed type instead of straight. The Speeder Handle in this type is especially handy for rim lug or head bolt work, and in fact can not be beaten for almost any work.

Flex Handle No.	Speeder Handle No.	Opening	Price
2116	2316	1/2	\$2.50

6072	1/2" Square Plug and 9/16" Hexagon Hole80

P & C Electrical Set

The Set illustrated above is the most wonderful thing ever offered for ignition, radio, carburetor and small bench work. A complete outfit and they will handle all those little jobs that have made you sweat to get at them. Every unit is made with the same quality and care as the larger ones. A wonderful ratchet, leather screw driver handle, screw driver blades, sliding "T", extension, sockets, and universal joint. The leather spinner handle works with the sockets also.

Buick Rocker Arm Oil Pipe Wrench

This wrench has a 3/8" open crow foot socket and is designed to handle the Rocker Arm Oil Pipe on the Buick. Will be found very handy for this job.

No.	Opening	Price
0005	3/8"	\$1.00

Crow Foot Sockets

The CROW FOOT SOCKETS here illustrated are exceptionally useful on all kinds of automobile work, on trucks and tractors, for airplane work and all classes of machine shop work. As shown by the cut these sockets work on any type of handle having 1/2" Square service connection—"L" Handles, Flex Handles, Speed Handle, Extensions etc. With an "L" handle and extension, a perfect Buick Head Wrench can be assembled. As illustrated they form an offset box wrench or open end wrench and give you a wrench of any angle desired. Made strong and will give long service. These CROW FOOT SOCKETS have no equal on the market. Made in 12 Point Box and Open End Style.

Ford Tools

The tools which are shown on the several pages following have been very popular numbers, most of them for several years, for work on the model "T" Ford. Many of them are called Ford tools but are very useful for other work as well. Some numbers are described and not illustrated, as they are known by many mechanics by their number and are in constant demand, on account of the fact that they are still popular. Most of these are "Old Faithfuls," and will be used for many years yet. Every tool is made of the best of steel, most of them being hand forged from Chrome Vanadium Steel, electrically heat treated and tempered and will give long service.

Ford Differential Housing Speed Wrench

A very handy speeder for taking off the bolts on the Ford rear end. Has many other uses.

No.	Opening	Sweep	Below Bend	Price
5316	1/2	5"	6"	\$1.25

Deep Box Socket Wrenches—Straight Handles

No.	Opening	Price
620	5/8	\$1.50
622	11/16	1.50
624	3/4	1.50

Deep Box Socket Wrenches—Offset Handles

Hand forged from one piece of Chrome Vanadium Steel.

No. 620-B Box Socket Wrench 5/8" Hex. Opening..\$1.75

This wrench is especially adapted to work on the Ford cylinder head and connecting rods.

No. 622-B Box Socket Wrench, 11/16" Hex. Opening 1.75

Especially designed for use on Oakland and Oldsmobile cylinder head nuts, also Studebaker cylinder head and connecting rods.

No. 624-B Box Socket Wrench, 3/4" Hex. Opening..\$1.75
Especially good for the Ford main bearing nut.

Ford Main Bearing Square Socket Wrenches

Hand forged from one piece of Chrome Vanadium Steel

No. 617 9/16" Square Opening\$1.35

The No. 617 is a plain Offset Socket Wrench with 9/16" square opening.

Straight Handle

Hand forged from one piece of Chrome Vanadium Steel.

No. 615 9/16" Square Opening\$1.50

The No. 615 is a plain Box Socket Wrench with 9/16" square opening.

Extension for No. 615

No.	Opening	Length	Price
615C	9/16	9"	\$1.50

Hand forged from one piece of Chrome Vanadium Steel.

No. 615-B 9/16" Square Opening\$1.75

The No. 615B is an Offset Box Socket Wrench with 9/16" square opening. (This wrench is much preferred by many mechanics.)

Ford Main Bearing Double Socket L Type Wrench

Hand forged from one piece of Chrome Vanadium Steel.

No. 444 9/16 sq. x 9/16 sq.\$1.95

The "L" Type Wrench No. 444 has one end 3 1/2" long and the other end 11" long.

P. & C. HAND FORGED TOOL COMPANY

No. 445 Ford Main Bearing and Connecting Rod Wrench

This wrench has the one end 9/16" square opening to fit the bolt head of the Ford main bearing, while the other end has a 5/8" hexagon opening to fit the connecting rods of the Ford car.

No 445 9/16" Square and 5/8" Hex. Opening.. 2.10

Ford Rear Main Bearing Wrench

No.	Opening	Price
447	3/4"	\$2.25

This wrench has a twelve point socket, which makes it possible to take one-twelfth of a turn. Has a good leverage and clears the crank case.

Ford Main Bearing Wrench

No. 120 F has a "U" Bend in the shank just back of the socket and is preferred by many mechanics to any other wrench for this main bearing job.

No.	Opening	Price
120F	9/16 Sq.	\$3.35

Ford Front Main Bearing Straight Shank Tee Wrench

No.	Opening	Price
110F	9/16 Sq.	\$2.25

No. 100-F Ford Fourth Connecting Rod Wrench

This wrench has the shank of the "T" handle offset sufficiently so that the fourth connecting rod can be reached through the inspection opening, and without removing the lower crank case.

No.	Opening	Price
100F	5/8	\$2.25

Ford Fourth Connecting Rod Wrench

Hand forged from one piece of Chrome Vanadium Steel

No.	Opening	Price
1520F12	5/8	\$1.50

This wrench has twelve point socket which makes it possible to take a twelfth turn. Clears the crank case.

No. 722 Ford Fly Wheel Wrench

Hand forged from one piece of Chrome Vanadium Steel

This wrench is designed to fit the cap screw of the Ford fly wheel and the bend is long enough so that the handle will clear the field coils which are attached to the fly wheel. 11/16" opening.

No.	Opening	Price
722	11/16	\$1.35

Ford Fly Wheel Cap Screw Wrench Double Bend Handle

Hand forged from one piece of Chrome Vanadium Steel.

This wrench also is for the cap screw of the Ford fly wheel, but the handle is bent so that while the handle is directly in line with the head of the wrench, thus giving a straight pull, the bend in the handle is such as to clear the Field coils attached to the fly wheel. The socket opening is 11/16"

No.	Opening	Price
722-B	11/16	\$1.50

Ford Flywheel Cap Screw Wrench

No.	Opening	Price
722C	11/16	\$1.50

The above wrench is for the cap screw of the Ford flywheel, to drop the bearing cap, without removing the motor from the car. Can also be used when motor is out.

No. 720 Ford Generator Wrench

Hand forged from one piece of Chrome Vanadium Steel

This wrench has the socket offset, and a 5/8" opening to fit the nuts on the generator, and has the handle bent slightly to clear the fan.

No.	Opening	Price
720	5/8\$1.25

Ford Generator Third Brush Wrench For adjusting third brush on Ford Generator

Hand forged from one piece of Chrome Vanadium Steel

No.	Opening	Price
1510AF	5/16\$.85

Ford Rear Perch Nut Wrench

Hand forged from one piece of Chrome Vanadium Steel

No.	Opening	Price
1632	1\$2.50

For Ford Front Perch use Wrench No. 1530

One Man Offset Box Socket Wrenches

The four wrenches illustrated above are great time savers. They act as a holder for the nut while work is being done from the other end. These wrenches are handy in many places, but the principal uses are as follows:

9/16 Opening Wrench for taking off crank case on Ford Car.

1/2 Opening Wrench for holding the nuts around Ford Differential.

5/8 Opening Wrench for holding the nuts around "Fordson Tractor Crank Case".

3/4 Opening Wrench for holding Old and New Model Ford Main Bearing Nuts.

**Chevrolet Main Bearing Wrench**

The above wrench has double offset, with 12-point sockets. A great wrench for Chevrolet Main Bearings.

No.	Opening	Price
8283B	13/16x7/8—12-point Sockets	\$2.50

Special Double Offset Socket Wrench

Hand forged from one piece of Chrome Vanadium Steel

Chevrolet connecting rod and main bearing.

No.	Openings	Price
8218	7/8 x9/16	\$2.50
8318	13/16x9/16	2.50

Chevrolet M. B. Offset Box Wrench

Hand forged from one piece of Chrome Vanadium Steel

In this single end wrench the 7/8" size is made in Hexagon, and the 13/16" is made in both hexagon and 12-point.

No.	Openings	Price
8200	7/8—Hexagon Socket	\$2.15
8300	13/16—Hexagon Socket	2.15
8300B	13/16—12-point Socket	2.15

**Chevrolet Universal Joint Wrench**

This wrench has openings 1/2" on one end and 9/16" on the other. Twelve point sockets. Fits Chevrolet joint and manifold nuts, and is very handy for all kinds of work.

No.	Openings	Price
8100	1/2x9/16	\$1.35

**Special Head Bolt Wrenches
Buick Head Bolt Wrench****The Above Illustration Shows a Two Piece Buick Head Bolt Wrench.**

The Box Wrench Handle has 5/8"—12-point Socket on one end, and 9/16" Hexagon Socket on the other. The EXTENSION has a 9/16" milled service connection which engages in the opening of the handle, or any handle having 9/16" Hexagon socket. The Crow foot socket is designed to get in close places, being very thin, with a web on top to give strength. This crow foot handles the back head bolt on the Standard Six where the oil pipe is in the way. This wrench works well on all models, and the BOX WRENCH is very handy around the Buick Rocker Arm Assembly, Manifolds and other places.

No.	Price
1020D	Two piece Buick Head Bolt Wrench... \$3.00
1020X	Box Handle—9/16" Hexagon & 5/8 12-point 2.00
1020Z	Crow Foot Extension—5/8" opening.... 1.50

Solid Buick Head Bolt Wrench With Crow Foot

1020C \$2.50
This wrench is similar to the above, except is a solid wrench. Has 5/8"—12-point Box Socket and 5/8" open Crow Foot.

Buick Head Bolt Wrench With 12-Point Socket on Both Ends

No. 1020B—5/8" 12-point Sockets Both Ends\$2.50

This wrench is "L" shaped, having 4" clearance, with the box socket on the offset swung back under the handle. Clears rocker arms on valve-in-head motors. Very useful in many places and on many cars.

Other Head Bolt Wrenches

No. 1020—5/8" 12-point Socket\$2.00
 No. 1020 is a single end wrench, similar to No. 1020B. A good wrench for Buick and other cars.
 No. 1022—11/16" 12-point Socket\$2.00

For Oldsmobile, Oakland and other cars having 11/16 Head Bolts.

Essex Head Bolt Wrenches

We make two styles of Essex Head Bolt Wrenches, both having 12-point Sockets. The single end wrench takes all bolts, by removing horn on late models. The double socket wrench takes all bolts without removing horn. Both wrenches work equally well on old and new models.

No. 1018—9/16 12-point Socket, one end\$1.75
 No. 1018B—9/16 12-point Socket, both ends ... 2.50

Hudson Head Bolt Wrench

This wrench has 25/32" opening, 12-point socket. The socket is offset from the handle. Socket 7/16" deep and handle 15" overall. A good wrench for the Hudson.

No. H425—25/32" 12-point shallow socket\$2.15

Chevrolet-Dodge-Studebaker-Head Bolt Wrenches

The following three wrenches have extra long shanks to clear obstructions, and good leverage on the handles. This type of wrench is preferred by many mechanics.

No.	Opening	Size	Price
A324—Chevrolet	3/4	12x18	\$2.40
A622—Dodge	11/16	12x18	2.20
A524—Studebaker	3/4	6½x13	2.00

Double Socket "L" Type Wrenches and forged from one piece of Chrome Vanadium Steel

The short end is used to start the nut off, or to tighten it tight, and the long end is then used as a "spinner" to run the nut off or on speedily.

No.	Opening	Size	Price
314	7/16x 7/16	1½x8	\$1.50
316	1/2 x 1/2	2 x9½	1.70
318	9/16x 9/16	2 x10	1.80
320	5/8 x 5/8	2 x10	1.90
322	11/16x11/16	2½x10	2.10
324	3/4 x 3/4	2½x11	2.25
328	7/8 x 7/8	2½x11	2.55

Long Bend Double Socket "L" Type Wrenches

These wrenches are similar to the ones shown above except they have longer offsets. Very good for head bolt work and are preferred by many mechanics to the regular 300 series.

No.	Openings	Size	Price
C314	7/16x 7/16	5x12	\$1.75
C316	1/2 x 1/2	5x12	1.95

C320	5/8 x 5/8	5x12	2.20
C322	11/16x11/16	5x12	2.35
C324	3/4 x 3/4	5x12	2.50
C328	7/8 x 7/8	5x12	2.80

Special Double Offset Socket Wrench

The double offset wrenches as illustrated are very handy for all kinds of work. The 9/16x5/8 is especially good for the Ford Carburetor, Generator, Manifold, Head Bolts and many other jobs on the Ford. All of the wrenches are equally good in their sizes.

No.	Openings	Price
1820U	9/16x 5/8	\$2.25
1822U	9/16x11/16	2.25
1824U	9/16x 3/4	2.25
2024U	5/8 x 3/4	2.65
2428U	3/4 x 7/8	2.65
2830U	7/8 x15/16	3.00

The following numbers have one offset one way and the other offset the opposite way instead of the "U" Type above.

1820	9/16x 5/8	\$2.25
1822	9/16x11/16	2.25
1824	9/16x 3/4	2.25
2024	5/8 x 3/4	2.65
2428	3/4 x 7/8	2.65
2830	7/8 x15/16	3.00

L Type Double Socket Wrench

Hand forged from one piece of Chrome Vanadium Steel
